The SFAR to allow flight out of and into College Park, Patomic, and Hyde are draconian. The restrictions on idividual freedoms are excessive with very little benefit to the securituy of the Washington DC area. The existing TFR area should be significantly reduced and free flight into and out of the three airports should be allowed. The presidents actual security woul be enhanced by allowing GA airplanes to do practice approachs into ADW; they help keep ADW controllers on their toes.
